Photovoltaic Hydrokinetic Rotary Brush

Smart brush for solar panel cleaning — Efficient, gentle and streakless cleaning.

Cleans effectivley with every spin

This spinning brush is designed for medium to large solar panel systems, using nothing more than your pressure washer's water flow to power the rotation. No extra Motor, no extra kit — just less to carry, less to maintain.

Its bristles are tough enough to break down dirt and grime, yet gentle enough to protect valuable photovoltaic surfaces. That means a thorough clean without risk of scratching, while cutting your washing time in half compared to a fixed brush. More panels cleaned in less time equals more efficiency for you.

Engineered to work with pure demineralised water, it delivers consistently streak-free results that keep panels performing at their best. And with a simple snap-fit onto your telescopic pole, you can reach high or awkward places safely from the ground — no ladders, no compromises.

Efficiency
Completely self-sufficient, it uses water pressure to spin the brush, taking the hard work of scrubbing off your hands. No extra power needed — just faster, easier cleaning.

Gentle & Effective
Designed for solar panel cleaning, the brush bristles effectively remove dirt without causing any damage to the photovoltaic cells.

Streak-Free Results
For lasting, streak-free results, pair this brush with pure filtered water to avoid mineral residue.

Safe Reach
Fully compatible with OVA8® telescopic poles, this brush allows you to clean safely from the ground — no ladders needed.

Controlled Cleaning
For a smarter, tidier clean, the optional splash guard prevents water spray from going where it shouldn't.

Specification	Photovoltaic Hydrokinetic Rotary Brush
Working Widths	60cm, 80cm, 100cm
Motor Type	Hydrokinetic (spins using water pressure)
Minimum Pressure & Flow	50 bar and 9 L/min (for 60–100 cm widths)
Pole Attachment	M22 connection, fits telescopic poles
Splash Guard	Optional aluminium splash-guard available
Bristles	Optimised for cleaning solar panels-safe and effective
Efficiency	Estimated to cut cleaning time in half versus fixed brushes
Water Type	Recommended for 100% pure demineralised water
Weight	**60cm:** 4.6kg **80cm:** 5.4kg **100cm:** 6.2kg
